

THERMOFORMING

New Product

New Pricing

“At McClarin Plastic we have implemented Lean Manufacturing and the Lenzkes system has provided a significant reduction in set up times. Shorter lead times and reduced run sizes require creative solution. With machine sizes up to 8’ x 16’ we are mounting molds weighing nearly 4000 lbs. With the Lenzkes clamping system our set team has confidence in this system to meet our expectations.”—Roger Kipp, V.P. Marketing and Engineering, McClarin Plastics

Quick Release

With clamping pressure up to 17,600 lbs-ft, our clamps will hold the largest and heaviest mold in place. No more searching for bolts, step blocks, washers, etc. Simply slide the clamping arm toward the mold, T-bar, Die or work piece, and adjust the arm by turning the ball pressure screw in the back. It’s that simple!

The clamping arm can be adjusted with an Allen key (supplied), torque wrench, air ratchet, etc. Torque sheets are also provided.

Thermoforming Rails, Arms & Bolts

Aluminum Rails	110-2-0914-17-4 (3 Feet Long)	\$232.00
	110-2-1220-17-5 (4 Feet Long)	\$309.00
	110-2-1524-17-6 (5 Feet Long)	\$374.00
	110-2-1828-17-7 (6 Feet Long)	\$448.00

Steel Rails	100-2-0914-17-4 (3 Feet Long)	\$519.00
	100-2-1220-17-5 (4 Feet Long)	\$573.00
	100-2-1524-17-6 (5 Feet Long)	\$693.00
	100-2-1828-17-7 (6 Feet Long)	\$998.00

Arms	100-5-078-16-9	\$216.00
-------------	----------------	----------

Bolts	395-058-037-1	\$6.00
	395-058-2.5	\$6.45
	395-058-3.0	\$7.55

Allen Key	610-3/8	\$10.50
